FULL-STACK DEVELOPER

Frontend-focused Full-Stack JavaScript Developer with hands-on experience building scalable web applications using React, Next.js, and TypeScript. Experienced in designing modular UI components, building responsive interfaces, integrating REST APIs, and implementing authentication flows. Strong focus on clean code, maintainable architecture, and reusable UI systems with attention to performance and scalability.

EDUCATION

Odesa Polytechnic National University

2021 - 2025

B.A. in Computer Science

Studied core computer science fundamentals including algorithms, data structures, databases, and software engineering principles. Applied knowledge in practical projects using TypeScript and modern web technologies.

SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, SCSS, Tailwind CSS, Redux, React Context, Component-based architecture

Backend: Node.js, Express, RESTful APIs, JWT Authentication

Databases: PostgreSQL, MongoDB, Firebase

Web Development: Responsive Design, Cross-Browser Compatibility, Pixel-Perfect UI

Tools & Deployment: Git, GitHub, npm, Vercel, Netlify, Render, Neon, VS Code

WORK EXPERIENCE

Full-Stack Developer | Freelance

2023 - 2025

- Developed modular and reusable frontend components with React, improving scalability and consistency across applications.
- Delivered CRUD dashboards, UI/UX improvements, production bug fixes.
- Key Projects:** SecureNotes (JWT auth, encrypted data, REST API), MovieTracker (Firebase Auth, TMDB API, recommendations), Mini Blog (Authenticated blogging with image upload & cloud storage).
- Applied advanced techniques: Next.js routing & API routes, hooks, context, Redux & Saga.

Full-Stack Developer | Axels (NDA)

2025 - Present

- Developing and maintaining web applications using React, Next.js, TypeScript, Node.js, Express, PostgreSQL, and MongoDB.
- Improving UI/UX, optimizing performance, and ensuring scalable architecture.
- Integrating RESTful APIs, implementing JWT-based authentication, and managing secure session flows.
- Deploying and maintaining production applications on Vercel, Render, Firebase, and Neon.
- Implementing new features, fixing production bugs, and improving existing live systems.
